PROFILE SUMMARY

Full Stack Software Engineer with **2.4+ years of experience** owning end-to-end delivery of scalable, responsive, and API-driven applications across frontend and backend development, testing, releases, and production support. Experienced in **Next.js, React.js, TypeScript, Node.js, Express.js, MongoDB, Redux, and REST APIs**, with strengths in reusable UI, authentication, database workflows, integrations, and performance optimization. Delivered **WhatsApp/email campaigns, secure access flows, payment integrations, and AI-powered applications** through Agile and cross-functional collaboration.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), Redux Toolkit, HTML5, CSS3, Tailwind CSS, Ant Design

Backend & APIs: Node.js, Express.js, REST APIs, GraphQL, OAuth 2.0, JWT, WebSockets, Zod, Swagger/OpenAPI, Gemini API

Databases & Caching: MongoDB, PostgreSQL, Redis, SQL, Prisma ORM, Mongoose ODM

Testing & Quality: Jest, JUnit, Mockito, JaCoCo, SonarQube

Architecture & Messaging: Kafka, RabbitMQ, Event-Driven Architecture, Microservices, Background Jobs, System Design

DevOps & Tools: Git, GitHub, Docker, Docker Compose, AWS, Vercel, GitHub Actions, CI/CD

Frontend Concepts: Responsive Design, Reusable Components, State Management, Performance Optimization

Backend Concepts: API Design, Database Design, Indexing, Transactions, Caching, Rate Limiting, Input Validation, RBAC

WORK EXPERIENCE

SuperAGI / Contlo (Bengaluru)

Nov 2025 – Apr 2026

Software Development Engineer I

- Owned **WhatsApp and email campaign workflows** across UI, API integration, testing, release validation, and support.
- Built campaign creation/management flows using **React.js, TypeScript, Redux, REST APIs, MSG91, and Mailgun**.
- Developed campaign dashboards for analytics, delivery status, failed recipients, retries, filters, and performance.
- Coordinated a **6-member Dev/QA team** across planning, tracking, debugging, testing, and release validation.
- Reduced DOM rendering overhead by **60%** for large datasets using **virtualization, lazy loading, and code splitting**.
- Reduced unnecessary re-renders by **30%** through debounced API search, filtering, and render optimization.

MBB Labs Private Limited (Maybank) (Bengaluru)

Jun 2024 – Nov 2025

Product Engineer Intern

- Delivered enterprise loan application features using **React.js, JavaScript, Redux**, and deployment environments.
- Built responsive UI workflows, integrated backend APIs, and supported business-critical commercial loan modules.
- Resolved **200+ production UI issues**, improving stability, cross-browser compatibility, and user experience.
- Contributed to a suite of **3,000+ automated tests** using **JUnit, Mockito, Jest, and JaCoCo**, raising coverage to **85%+**.
- Analyzed UI flows, API payloads, DB mappings, IDs, and business rules while validating deployments and releases.

Opethic Software Solutions LLP (Solapur)

Sep 2023 – Jan 2024

Junior Software Developer

- Owned end-to-end authentication and access-control workflows across **React.js, Node.js, Express.js, and MongoDB**.
- Built **JWT-secured login, protected routes, and REST API flows**, improving onboarding efficiency by **20%**.
- Integrated backend APIs with responsive UI workflows covering validation, state handling, and error scenarios.
- Reduced unnecessary API requests by **30%** using debounced search and filtering across data-driven screens.
- Improved UI responsiveness by **10%** with Redux and enabled real-time updates, increasing engagement by **25%**.

PROJECTS

Rabbit – MERN Stack E-Commerce Application

 Live |  Repo

- Built a MERN e-commerce platform with product listing, cart, checkout, order tracking, and admin workflows.
- Integrated **Razorpay live payment APIs** for secure online payments and real-time order processing flows.
- Implemented **Redux Toolkit** and **JWT authentication** for scalable state management and protected routes.

AI Quick Blog – MERN Stack Blogging Application

 Live |  Repo

- Built an AI-powered MERN blogging platform with home page, blog details, admin panel, and fully responsive UI.
- Integrated **Google Gemini API** for AI blog generation and **ImageKit** for optimized image upload workflows.
- Developed secure **REST APIs** for blogs, comments, admin data, image handling, and deployed app on **Vercel**.

EDUCATION

Dr. Babasaheb Ambedkar Technological University, Lonere

- Bachelor of Technology, Civil Engineering (2018 – 2021) — GPA: 8.88
